

POLITICAL ORGANIZATION IN THE BELIZE VALLEY:
EXCAVATIONS AT BAKING POT, CAHAL PECH AND
XUNANTUNICH

By

Carolyn Marie Audet

Dissertation

Submitted to the Faculty of the
Graduate School of Vanderbilt University
in partial fulfillment of the requirements

for the degree of

DOCTOR OF PHILOSOPHY

in

Anthropology

December, 2006

Nashville, Tennessee

Francisco Estrada-Belli, Chair

John Janusek

William Fowler

Lisa Lucero

DEDICATION

To my family.

ACKNOWLEDGEMENTS

The research and the writing of this dissertation was a challenging process, full of exciting discoveries and disheartening frustrations. Numerous people supported, guided, and inspired me along the way. The three most important people in my life are my mother, father, and brother. Throughout my time living abroad they have been instrumental to my emotional, financial, and scholastic survival. They have encouraged and facilitated my research, and the completion of this dissertation is as much their success as my own.

My advisors at Vanderbilt and in the field have been both mentors and role models throughout this process. Jaime Awe, the director of the Belize Valley Archaeological Reconnaissance Project, provided both support and direction for my research and inspired me to become a better friend, teacher, and person. John Janusek's unwavering support provided me some of the earliest encouragement and advice during the writing process. Francisco Estrada-Belli's knowledge of archaeology in the Petén and his countless hours of editing have improved both my dissertation and knowledge of Maya archaeology. Lisa Lucero has given me unparalleled support and advice throughout the writing process. Her knowledge about the Maya and the academic community has given me a broader perspective on my current and future research. William Fowler has applied his perspective as the editor of *Ancient Mesoamerica* to improve my writing. He has repeatedly corrected grammatical errors and has been instrumental in noting the limitations of the data, encouraging sound logical arguments and ensuring I understood the

wider implications of my research. Finally, Arthur Demarest has provided me great inspiration to combine community development and academic research. His projects in and around Cancuen are models for responsible archaeology throughout the world.

My friends have often been my greatest mentors and advisors. Errin Weller deserves special mention as both a great friend and also a wonderful editor. No one wants to read another dissertation while they are writing their own NSF grants and dissertation prospectus, but Errin would edit chapters more quickly than I could hope, pushing me to complete this journey. Chris Dixon also deserves special mention. As my roommate, friend, and research partner in Belize, Chris kept me sane throughout countless field seasons, forcing me to laugh at even the most challenging situations. Bill Poe and Sue Hayes provided field and lab support, not to mention great friendships, though three seasons in Baking Pot. Their tenacity and hard work led to fieldwork credit for students through Sonoma State University, a new vehicle for the project, and countless hours of GPS and GIS data collection at Baking Pot. Julie Hoggarth also provided great field support for the project, as well as her friendship throughout our field seasons in Belize.

Financial support for my research was provided by four sources: Vanderbilt University, the Tourism Development Project, the Foundation for the Advancement of Mesoamerican Studies Inc. (FAMSI), and the Belize Valley Archaeological Reconnaissance Project. The College of Arts and Science at Vanderbilt University provided travel grants, and money for C14 dating. The

Department of Religion provided a grant to conduct research during the 2004 season. FAMSI provided money to stabilize and transport the remains of a painted and stuccoed perishable object found in the tomb of a Baking Pot ruler analyzed by the Smithsonian Institute. The Tourism Development Project, with funds from the Inter- American Development Bank, funded excavation and consolidation efforts at Xunantunich and Cahal Pech from 2000-2004. Data recovered from those two centers was done so while I was employed by the Ministry of Tourism, Belize, under the direction of Drs. Allan Moore and Jaime Awe.

Support for conducting excavations was provided by several excellent excavation assistants from San Jose Succotz. My foreman, Antonio Itza, is an extremely intelligent and knowledgeable man who taught me more about excavation technique and mapping than any professor. Nasario Puc is one of the greatest excavators and illustrators in western Belize, and he provided many of the artifact illustrations as well as plans and profiles in Chapters 5 and 6. Gustavo Valenzuela was the head artist on the Tourism Development Project. Trained in Guatemala City, Gustavo illustrated most of the complex polychrome, bichrome, and carved vessels in Chapter 5. A talent like no other, Gustavo could ably draw and reconstruct even the most intricate vessel.

My friends in Belize made the research process enjoyable. In Belize, Ada Wood became a wonderful friend and second mother to me during my extended absences from Canada. Alicia and Viejo Guerra, along with Ada, ensured I had a roof over my head, food in my stomach, and friends to spend time with during long field seasons in San Ignacio. Lisa Awe literally lent me her home for my last

8 months in Cayo, and provided me moral support for the long hours in the field and lab. In Nashville, I have been extremely lucky to find wonderful people at the hockey rink. The Ice Holes, Centennial (Northern) Mafia, and Nashville Athenas have been wonderful friends. In particular, nights out with Shawn, Terry, Frankie, Scott, Amanda, Annette and Pete showed me what life in Nashville had to offer. While they may not have comprehended why I wanted to write this thesis, they gave me their friendship, keeping me sane (mostly!) during the writing process.

While writing my dissertation I have had the support of several graduate students and staff members from Vanderbilt University. Mark Dalhouse, the Director of the Office of Active Citizenship and Service, has provided me with numerous unforeseen opportunities to travel and work in Africa, expanding my understanding of this world in ways I do not yet realize. Britta Watters, the Manager of International Programs, has also supported the development of new research and community development programs, in addition to being a great friend. Brigitte Kovacevich helped me conquer the dots... those hideous dots, saving me time and my sanity as I finished the writing process. Numerous other graduate students here have also given unselfishly of themselves throughout my five years at Vanderbilt and I wish them the best of luck as they begin their own writing.
